

1) According to port current type

2) to active power flow

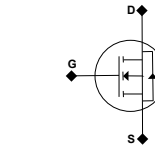

3) Switching device type

4) DC constant polarity

Line Commutated Converter(LCC)
e.g. Graetz, HVDC,...

Voltage (VSC)

Force Commutated Converter

Current (CSC)

According to Ned Mohan 's and Amirnaser Yazdani's books [1-2]

*In some references, 'inverter', resp. 'rectifier', are sometimes rather linked to the step up, resp step down, behavior of the Voltage between AC and DC
