

1) According to port current type

2) to active power flow

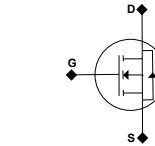

3) Switching device type

Line Commutated Converter(LCC)
e.g. Graetz, HVDC,...

4) DC constant polarity

Voltage (VSC)

Force Commutated Converter

Current (CSC)

According to Ned Mohan 's and Amirnaser Yazdani's books [1-2]

Scope of today

*In some references, **inverter**, resp. **rectifier**, are sometimes rather linked to the step up, resp. step down, behavior of the Voltage between AC and DC
